

Government audits, grounded in the real world.

GPP Analytics Inc. | California-based | Serving state and local governments

GPP brings a nimble team of senior auditors to difficult questions about public operations, spending, and accountability. We analyze records, talk with the people doing the work, and observe operations in person. Clients work directly with experienced auditors who explain the findings and recommend practical changes.

WHERE WE HELP

- Performance and internal audits; operational and management reviews.
- Construction contracts, procurement, and expenditure controls.
- Program administration, compliance, staffing, and service delivery.
- Financial analysis, cost allocation, and risk assessment.

SELECTED PUBLIC WORK

Utah State Board of Education

Estimated the direct, indirect, and ancillary costs of administering federal education funding. [Public report](#)

BART Office of the Inspector General

Examined construction change-order oversight, data quality, and controls. The OIG reported management agreement with all recommendations. [Public report](#)

City of Sacramento

Connected shelter capacity, staffing, and service delivery in an animal care audit with 31 recommendations across ten findings. [Public report](#)

Additional public reports and experience: gppanalytics.com. Some engagements result in non-public reports.

HOW WE WORK

We provide independent, nonpartisan analysis. We listen to staff and leadership, adapt our methods to the question, and support our conclusions with evidence.

STANDARDS AND QUALITY

We use Government Auditing Standards (GAGAS) and the IIA Global Internal Audit Standards, as appropriate to each engagement.
